

TRAINING DATES FOR DISA DIRECT STOREFRONT (DDSF) Wave 2 – DISN Backbone, Multilevel Secure Voice (DRSN) and SBU Voice (VoIP and DSN)

Wave 2 DISA Direct Storefront (DDSF) – DISN Backbone, Multilevel Secure Voice (DRSN) and SBU Voice (VoIP and DSN): Refocused, Redesigned with You in Mind

DDSF Wave 2 was successfully deployed on 14 November 2014. Mission Partners can now use DDSF to request the following additional DISA services: *DISN Backbone, Multilevel Secure Voice (DRSN) and SBU Voice (VoIP and DSN)*. DDSF will follow a “wave” rollout strategy that transitions the remaining Network Services capabilities from DISA Direct Order Entry (DDOE) to DDSF. In this release, Mission Partners (MP) can order DISN Backbone, Multilevel Secure Voice (DRSN) and SBU Voice (VoIP and DSN) services in a user friendly, e-Commerce-like platform.

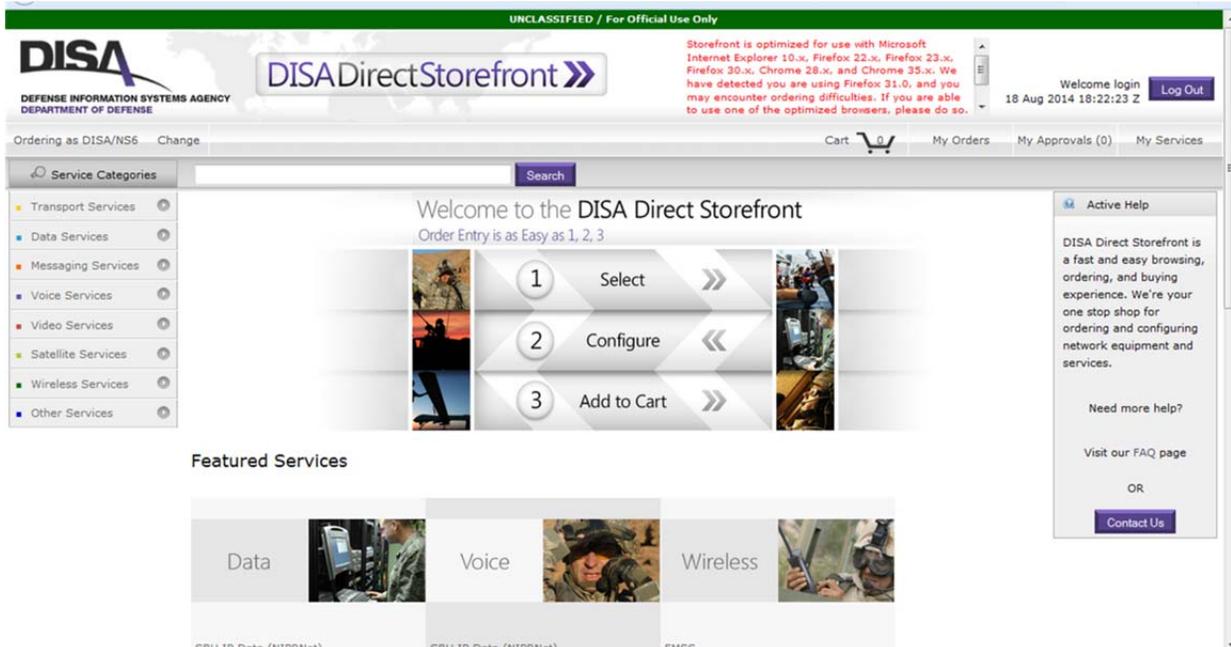

DISA Direct Storefront was designed with users and mission partners in mind. Information about the services can be easily discovered, ordered, and tracked through the new application. Leveraging **common processes** on the backend, Storefront enforces consistency in ordering of standard telecommunications and other service requests. In-turn, consistent orders allow implementation of tools and **processes** that deliver automated provisioning, improving order accuracy and speed.

The DDSF PMO offers the following training sessions via [Defense Connect Online](https://connectcol.dco.dod.mil/ddsf-training/) <https://connectcol.dco.dod.mil/ddsf-training/> Bridge# 301-225-5555 DSN: 375-5555 (see Meeting ID below) for Mission Partners (MP), Customer Account Managers (CAMs), DISA Global Support Center (DGSC), DISA Field Offices and the Mobility PMO staff:
