

August 24, 2015: UPDATED: Establish and Connect to a Virtual Private Network (VPN) Customer Ordering Guide. Updated Customer Ordering Guide provides the Whitelist/Access Control Lists (ACL) process, and updates information required for the Authority to Operate (ATO) for Private Data Internet Service Provider (ISP) Service. The Private Data ISP Service is a DISA established VPN; therefore, customers can only “connect to this VPN”. The VPN Identifier, (ID) is DKL300227.

This guide provides the process and detailed information to order VPN types of services. The VPN Customer Ordering Guide is available at the following link:
<http://disa.mil/Services/Network-Services/Notices>. This document updates and replaces all previous versions.
